

We Envision the Day...

WHEN NO PERSON GOES WITHOUT TREATMENT
BECAUSE OF AN INABILITY TO PAY

Cost should not be a barrier to accessing your treatment.

The Assistance Fund helps patients facing high medical out-of-pocket costs by providing financial assistance for coinsurance, deductibles, and other health-related expenses. Our mission is to provide underinsured people living with life-threatening, chronic, and rare diseases access to critical treatment through financial assistance, education, and advocacy.

GIVING FOR EVERYDAY IMPACT

94% of TAF's expenditures
provide direct financial
assistance to patients.

We help patients across the
country in all 50 states,
Washington, D.C., and Puerto Rico.

We have assisted nearly
180,000 patients since 2009.

Our Patient Advocates handle
125,000 calls a year.

We process more than
600,000 claims a year.

How We Help

HOW DOES THE ASSISTANCE FUND WORK?

Patients who have insurance may be eligible for financial assistance for copayments, coinsurance, deductibles, and other health-related expenses for FDA-approved medications for diseases on our Covered Diseases list. The type of assistance may vary depending on the disease. In 2022, we assisted more than 40,000 patients from all 50 states, Washington, DC, and Puerto Rico.

WHO IS ELIGIBLE FOR ASSISTANCE?

U.S. residents who currently have insurance, including Medicare, Medicaid, TRICARE, and private coverage, and have been diagnosed with a disease for which we have an open disease program may apply for financial assistance for FDA-approved treatment. The Assistance Fund will verify your financial need and that you are not currently receiving assistance from another independent charitable patient assistance organization.

HOW DO I APPLY FOR ASSISTANCE?

To determine whether you are eligible for financial assistance, complete an application on our website (www.tafcares.org) or call (855) 845-3663 to speak with a Patient Advocate. Our caring and supportive bilingual Patient Advocates handle 125,000 calls per year.

WHAT DOCUMENTATION IS REQUIRED TO APPLY?

You will be asked to verify your demographic, insurance, and financial information.

CAN I USE MY USUAL PHARMACY?

Our copay assistance can be used at any pharmacy, as long as the pharmacy is in-network with your primary insurance and is able to dispense your medication.

DISEASE PROGRAM WAITLISTS:

If a disease program is not accepting new applicants, eligible patients may join the program's waitlist. TAF's disease program waitlists allow patients to enroll on a first-come, first-served basis when new funding becomes available. Learn more: tafcares.org/wait-list-faq/.

HOW LONG WILL I BE ABLE TO RECEIVE FINANCIAL ASSISTANCE?

If you meet the eligibility criteria, you will receive program participation approval. Financial assistance is provided on a calendar-year basis (unless otherwise specified for the applicable program), with the opportunity to renew each year.

I AM A PATIENT ADVOCATE.

"I have the privilege of helping patients in need get financial assistance for their critical treatment. I help them focus on getting better and enjoying their time with their families, without having to worry about whether they can afford their medications."

I HAVE PROSTATE CANCER.

"When I learned about The Assistance Fund, it was definitely a relief. The peace of mind knowing that I can afford my medication is priceless."

Covered Diseases

For the most current list of covered diseases, please visit our website: www.tafcares.org. New disease programs may open at any time.

Acid Sphingomyelinase Deficiency	Long-Chain Fatty Acid Oxidation Disorders
Acromegaly	Lupus
Acute Myeloid Leukemia	Lysosomal Acid Lipase Deficiency
Alpha-1 Antitrypsin Deficiency	Melanoma
Amyloidosis	MPS Type 1
Amyotrophic Lateral Sclerosis (ALS)	MPS VII-Sly Syndrome
Ankylosing Spondylitis	Multiple Sclerosis
Asthma	Myasthenia Gravis
Atypical Hemolytic Uremic Syndrome (AHUS)	Myositis
Bladder Cancer (Federal)	Nephrotic Syndrome
Breast Cancer	Neuroendocrine Tumors
Chronic Granulomatous Disease (CGD)	Neuromyelitis Optica Spectrum Disorder
Chronic Inflammatory Demyelinating Polyneuropathy (CIDP)	Neutrophilic Keratitis
Chronic Lymphocytic Leukemia	Non-Small Cell Lung Cancer
Clostridium Difficile-Associated Diarrhea	Nontuberculous Mycobacterial Lung Disease
Cold Agglutinin Disease	Ovarian Cancer
Crohn's Disease	Pancreatic Cancer
Cystic Fibrosis	Parathyroid Diseases (Hypoparathyroidism, Hyperparathyroidism)
Cystinosis	Parkinson's Disease
Duchenne Muscular Dystrophy	Paroxysmal Nocturnal Hemoglobinuria
Epilepsy (Seizures)	Pompe Disease
Fabry Disease	Porphyria
Gastric Cancer	Primary Biliary Cholangitis (Cirrhosis)
Gaucher Disease	Primary Hyperoxaluria
Gout	Primary Immunodeficiency
Head and Neck Cancer	Prostate Cancer
Hemophilia	Psoriasis
Hepatitis C	Psoriatic Arthritis
