

We Envision the Day...

WHEN NO PERSON GOES WITHOUT TREATMENT
BECAUSE OF AN INABILITY TO PAY

Cost should not be a barrier to accessing your treatment.

The Assistance Fund helps patients facing high medical out-of-pocket costs by providing financial assistance for coinsurance, deductibles, and other health-related expenses. Our mission is to provide underinsured people living with life-threatening, chronic, and rare diseases access to critical treatment through financial assistance, education, and advocacy.

GIVING FOR EVERYDAY IMPACT

94% of TAF's expenditures
provide direct financial
assistance to patients.

We help patients across the
country in all 50 states,
Washington, D.C., and Puerto Rico.

We have assisted more than
190,000 patients since 2009.

Our Patient Advocates handle
115,000 calls a year.

We process more than
380,000 claims a year.

How We Help

HOW DOES THE ASSISTANCE FUND WORK?

Patients who have insurance may be eligible for financial assistance for copayments, coinsurance, deductibles, and other health related expenses for FDA-approved medications for diseases on our Covered Diseases list. The type of assistance may vary depending on the disease. In 2023, we assisted nearly 40,000 patients from all 50 states, Washington, DC, and Puerto Rico.

WHO IS ELIGIBLE FOR ASSISTANCE?

U.S. residents who currently have insurance, including Medicare, Medicaid, TRICARE, and private coverage, and have been diagnosed with a disease for which we have an open disease program may apply for financial assistance for FDA-approved treatment. The Assistance Fund will verify your financial need and that you are not currently receiving assistance from another independent charitable patient assistance organization.

HOW DO I APPLY FOR ASSISTANCE?

To determine whether you are eligible for financial assistance, complete an application on our website (www.tafcares.org) or call (855) 845-3663 to speak with a Patient Advocate. Our caring and supportive bilingual Patient Advocates handle 115,000 calls per year.

WHAT DOCUMENTATION IS REQUIRED TO APPLY?

You will be asked to verify your demographic, insurance, and financial information.

CAN I USE MY USUAL PHARMACY?

Our copay assistance can be used at any pharmacy, as long as the pharmacy is in-network with your primary insurance and is able to dispense your medication.

DISEASE PROGRAM WAITLISTS:

If a disease program is not accepting new applicants, eligible patients may join the program's waitlist. TAF's disease program waitlists allow patients to enroll on a first-come, first-served basis when new funding becomes available. Learn more: tafcares.org/wait-list-faq/.

HOW LONG WILL I BE ABLE TO RECEIVE FINANCIAL ASSISTANCE?

If you meet the eligibility criteria, you will receive program participation approval. Financial assistance is provided on a calendar-year basis (unless otherwise specified for the applicable program), with the opportunity to renew each year.

I AM A PATIENT ADVOCATE.

"I have the privilege of helping patients in need get financial assistance for their critical treatment. I help them focus on getting better and enjoying their time with their families, without having to worry about whether they can afford their medications."

I HAVE PROSTATE CANCER.

"When I learned about The Assistance Fund, it was definitely a relief. The peace of mind knowing that I can afford my medication is priceless."

Covered Diseases

For the most current list of covered diseases, please visit our website: www.tafcares.org. New disease programs may open at any time.

Acid Sphingomyelinase Deficiency	Lupus
Acromegaly	Lysosomal Acid Lipase Deficiency
Activated Phosphoinositide 3-kinase Delta Syndrome	Melanoma
Acute Myeloid Leukemia	MPS Type 1
Alpha-1 Antitrypsin Deficiency	MPS VII-Sly Syndrome
Amyloidosis	Multiple Sclerosis
Amyotrophic Lateral Sclerosis (ALS)	Myasthenia Gravis
Ankylosing Spondylitis	Myositis
Asthma	Nephrotic Syndrome
Atypical Hemolytic Uremic Syndrome (AHUS)	Neuroendocrine Tumors
Biliary Tract Cancer	Neurofibromatosis
Bladder Cancer (Federal)	Neuromyelitis Optica Spectrum Disorder
Breast Cancer	Neurotrophic Keratitis
Chronic Granulomatous Disease (CGD)	Non-Small Cell Lung Cancer
Chronic Inflammatory Demyelinating Polyneuropathy	Nontuberculous Mycobacterial Lung Disease
Chronic Lymphocytic Leukemia	Ovarian Cancer
Clostridium Difficile-Associated Diarrhea	Pancreatic Cancer
Cold Agglutinin Disease	Parathyroid Diseases (Hypoparathyroidism, Hyperparathyroidism)
Crohn's Disease	Parkinson's Disease
Cystic Fibrosis	Paroxysmal Nocturnal Hemoglobinuria
Cystinosis	Pompe Disease
Duchenne Muscular Dystrophy	Porphyria
Epidermolysis Bullosa	Primary Biliary Cholangitis
Epilepsy (Seizures)	Primary Hyperoxaluria
Fabry Disease	Primary Immunodeficiency
Gastric Cancer	Prostate Cancer
Gaucher Disease	Psoriasis
Gout	Psoriatic Arthritis
Head and Neck Cancer	Pulmonary Hypertension
Hemophilia	Renal Cell Carcinoma
Hepatitis C	Rett Syndrome
Hepatocellular Carcinoma	Rheumatoid Arthritis
Hereditary Angioedema	Sarcoidosis
Hodgkin Lymphoma	Short Bowel Syndrome
Hunter Syndrome	Sickle Cell Disease
Hypophosphatasia	Skin and Skin Structure Infections
Hypophosphatemia	Small Cell Lung Cancer
